

A circular cross-section of a head, likely representing a helmet or a protective cap, with a grid of points overlaid. A central circle is drawn, and two small, curved lines are visible on the left and right sides of the circle, possibly indicating the location of sensors or measurement points.

A circular cross-section of a head, likely representing a brain, with a grid of points overlaid. A central circle is drawn, and a small triangle is positioned at the top center of the circle. The background is a gradient of blue and purple, suggesting a heatmap or a specific imaging technique.

A circular cross-section of a head, likely representing a brain, with a grid of points overlaid. A central circle is drawn, and a small triangle is positioned at the top center of the circle. The background is dark blue, and the grid points are small black dots.
